DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to methods of screening for skin irritants, classified in class 435, subclass 6.
 - II. Claims 10-18, drawn to compositions comprising NIKS cells, classified in class 435, subclass 325.
 - III. Claims 19-24, drawn to methods of identifying irritant responsive genes, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because they are not disclosed as capable of use together and have different modes of operation, functions and effects. In particular, the methods of groups I and III do not recite, require or result in the production of the cells of group II. Furthermore, the methods of groups I and III have different goals and utilize different process steps to achieve these effects.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as demonstrated by their different classification and/or recognized divergent subject matter and because inventions I-III require different searches that are not

coextensive, examination of these claims would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

4. A telephone call was made to J. Mitchell Jones on 5/21/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
